OVERVIEW

This BRIGANCE® • PCI Reading Program Placement Guide, used in conjunction with the BRIGANCE® Comprehensive Inventory of Basic Skills II (CIBS II) Reading/ELA volume or the CIBS II Standardized assessments, will help you optimize reading instruction and increase reading skill retention for your students. Within this guide you will find information about:

- establishing a student's reading goals and objectives
- selecting appropriate reading lessons for instruction
- determining a student's level for the PCI Reading Program
- monitoring student progress

ABOUT THE PCI READING PROGRAM

The PCI Reading Program is a scientifically research-based curriculum created specifically to teach students with intellectual disabilities, autism, and significant learning disabilities to read. Designed as a three-level system with 62 controlled-vocabulary books, the program helps nonreaders learn to read step by step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

ABOUT THE BRIGANCE® COMPREHENSIVE INVENTORY OF BASIC SKILLS II (CIBS II) AND THE CIBS II STANDARDIZED

The BRIGANCE® CIBS II Reading/ELA inventory is one of two content-specific volumes that make up the comprehensive CIBS II collection of valid, reliable, and well-researched criterion-referenced reading, ELA, and math assessments for students at Pre-K to grade 9 levels. The CIBS II Reading/ELA assessments provide a complete range of information on students' academic skill levels and allow teachers to accurately pinpoint a student's present level of performance. Key assessments in the CIBS II have also been standardized and validated on students ages five to thirteen. The norm-referenced BRIGANCE® CIBS II Standardized may be used to derive quotients, percentiles, and grade and age equivalents.

HOW THE TWO PRODUCTS WORK TOGETHER

Learning to read is a complex task involving the acquisition of a number of skills. Each of these skills should be initiated at developmentally appropriate intervals, but identifying unique developmental sequences for each student can be difficult.

The CIBS II Reading/ELA and CIBS II Standardized assessments help special education teachers determine each student's present levels of academic achievement and functional performance (PLAAFP). Assessment results can then be aligned to the systematic progression of learning within the PCI Reading Program by level and skill area.

Using the CIBS II (either the criterion-referenced or norm-referenced inventory, as appropriate to your assessment needs) in combination with the PCI Reading Program will help you create a developmentally appropriate reading curriculum with personalized, differentiated instruction for each student in the classroom.

INFORMATION FOR USING THE COMPREHENSIVE INVENTORY OF BASIC SKILLS II (CIBS II)

The PCI Reading Program contains direct instruction in 11 skill areas assessed in the criterion-referenced CIBS II:

- Readiness
- Listening
- Word Recognition Grade Placement
- Oral Reading
- Reading Comprehension—Short Passages
- Reading Comprehension—Long Passages
- Word Analysis
- Functional Word Recognition
- Spelling
- Writing
- Responding to Writing Prompts

You can use the results of the CIBS II assessments, documented in a student's Record Book, to determine skill areas that you wish to set as instructional objectives. The Placement Table: CIBS II Assessments (see pp. 9–12) correlates these 11 CIBS II skill areas to lessons within the PCI Reading Program that provide instruction in those skill areas.

For example, if the CIBS II indicates that an appropriate instructional goal for a student is reading readiness, you can teach and reinforce readiness skills by selecting one or more of the lessons for readiness recommended on the Placement Table: CIBS II Assessments. The location of the lessons within the PCI Reading Program are provided by level, component name, and page number for easy reference. In addition, the Teacher's Guide page number(s) associated with each activity is listed.

USING THE CIBS II TO DETERMINE SKILL AREA OBJECTIVES AND CORRESPONDING LESSONS

- **1.** Administer the CIBS II Reading/ELA assessments.
- **2.** Document the assessment results in the student's *Record Book*, circling items the student has mastered and underlining the skills/items that you wish to set as instructional objectives for the student.

For each the stude Circle Under instru	evaluation evaluation entries asserting the skiller the actional	ssment data an ll/item number skills/items tha	ent color pen or p d to show the stuc of each correct res at you wish to set ne student to achie	lent's progress. sponse. as	•	used to obtain	your results. 	Write the Words	Three	Activity Sheets, pp. 72, 77, 82, 87, 92, 97, 102, 107, 112, 117, 122, 127, 132, 137, 142, 147, 152, 157, 162, 167	p. 58
	Onset Lessons for 23 sounds	Three	Letter/Sound Correspondence Lessons, pp. 2–185	pp. 14 and 33–41
	Make a List	Three	Write and Read, pp. 2, 7, 12, 17, 22, 27, 32, 37, 42, 47, 52, 57, 62, 67, 72, 77, 82, 87, 92, 97	p. 56

5. Retain the Placement Table: CIBS II Assessments for reference when writing IEPs, creating lesson plans, and gathering materials for instruction. In addition, the Placement Table: CIBS II Assessments can be used for progress monitoring (see "Using the Placement Table: CIBS II Assessments for Progress Monitoring" on the next page).

USING THE CIBS II TO DETERMINE PROGRAM PLACEMENT LEVEL

The information in the Placement Table: CIBS II Assessments can also be used to establish a mode level for the student. The mode is often the appropriate *PCI Reading Program* placement level for a student.

- 1. Circle the PCI Reading Program level next to each recommended lesson you highlighted on the Placement Table: CIBS II Assessments (see example above).
- 2. Count the number of Level Ones you circled on all four pages of the Placement Table: CIBS II Assessments, and record the total on a piece of paper. Repeat the process for Levels Two and Three. For example:

One: 1 Two: 2 Three: 4

3. The level with the highest count is the mode (e.g., Level Three). The mode indicates the level for initial placement. If the highest count is shared by two or more levels, then place the student in the lower level.

ADDITIONAL PLACEMENT CONSIDERATIONS

In certain circumstances, it may be necessary for the teacher to deviate from the placement directions and/or the placement level indicated by the mode. For example, when determining the mode of a student who struggles with fine-motor skills, consider excluding assessments requiring writing from the calculation of the mode. Also, students who rely heavily on patterns of consistency and repetition may need to begin at Level One even if the calculated mode, given assessment results, indicates a higher level of placement.

USING THE PLACEMENT TABLE: CIBS II ASSESSMENTS FOR PROGRESS MONITORING

To monitor student progress, administer the CIBS II Reading/ELA assessments at regular intervals throughout the school year (e.g., quarterly). The results will help you document progress and identify new skill areas for instruction.

If the results do not indicate progress, select additional *PCI Reading Program* lessons from the Placement Table: CIBS II Assessments to supplement instruction.

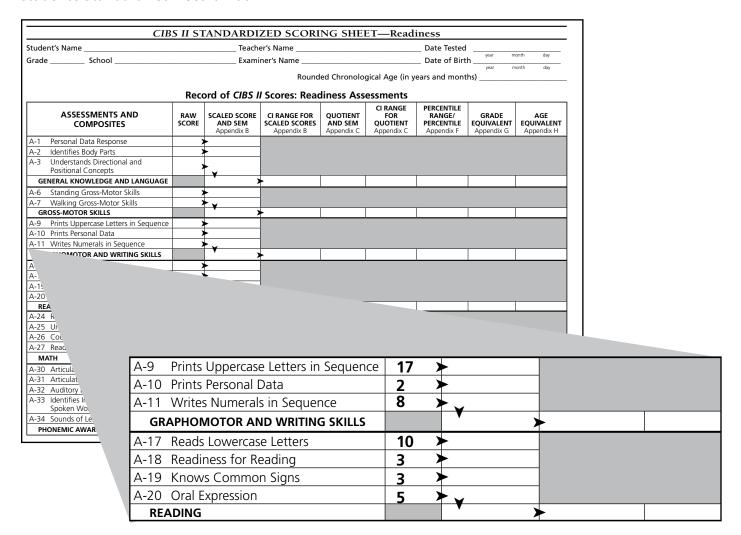

INFORMATION FOR USING THE CIBS II STANDARDIZED

Depending on assessment needs, the CIBS II Standardized may be administered instead of or in addition to the criterion-referenced CIBS II. The norm-referenced assessment results from the CIBS II Standardized may also be used in conjunction with the PCI Reading Program to ensure an effective, differentiated approach to reading instruction.

The PCI Reading Program is carefully constructed to incrementally increase in reading skill complexity throughout the three levels. Because of this intentional scaffolding, students should enter the program at the level for which they are developmentally ready. You can use the raw score results of the CIBS II Standardized assessments, documented on a student's Standardized Scoring Sheet(s) within the Standardized Record Book, to determine an appropriate level for student placement in the PCI Reading Program. The Placement Table: CIBS II Standardized Assessments (see pp. 13–15) associates a raw score range by skill area with a PCI Reading Program level. The collective data can then be interpreted to arrive at the appropriate PCI Reading Program level.

USING THE CIBS II STANDARDIZED TO DETERMINE PROGRAM PLACEMENT LEVEL

- **1.** Administer the CIBS II Standardized assessments.
- 2. Document the assessment results on the appropriate Standardized Scoring Sheet(s) located in the student's Standardized Record Book.

- **3.** Make a copy of the Placement Table: CIBS II Standardized Assessments (pp. 13–15).
- **4.** Highlight the raw score range and *PCI Reading Program* Level on the Placement Table: *CIBS II Standardized* Assessments that correspond to the student's raw score for each skill area on the *CIBS II Standardized* Scoring Sheet(s).

	Placement Table: CIBS II	Standardized Assessments	
Assessment	Skill Area	Raw Score Range	PCI Reading Program Level
		0–16	One
A-9	Prints Uppercase Letters in Sequence	17–24	Two
		25–26	Three
		0–3	One
A-10	Prints Personal Data	4–5	Two
		6	Three
		0–4	One
A-13	Visual Motor Skills—Forms	5–6	Two
		7	Three
		0–16	One

		25–26	Three
		0–16	One
A-16	Prints Lowercase Letters Dictated	17–24	Two
		25–26	Three
		0–16	One
A-17	Reads Lowercase Letters	17–24	Two
		25–26	Three

5. Count the number of Level Ones you circled on all three pages of the Placement Table: *CIBS II Standardized* Assessments, and record the total on a piece of paper. Repeat the process for Levels Two and Three. For example:

One: 5 Two: 1 Three: 0

6. The level with the highest count is the mode (e.g., Level One); the mode indicates the level for initial placement. If the highest count is shared by two or more levels, then place the student in the lower level.

ADDITIONAL PLACEMENT CONSIDERATIONS

In certain circumstances, it may be necessary for the teacher to deviate from the placement directions and/or the placement level indicated by the mode. For example, when determining the mode of a student who struggles with fine-motor skills, consider excluding assessments requiring writing from the calculation of the mode. Also, students who rely heavily on patterns of consistency and repetition may need to begin at Level One even if the calculated mode, given assessment results, indicates a higher level of placement.
