Founded in 1978, Wieser Educational is a family owned business dedicated to providing the best possible instructional materials to meet the needs of Struggling Learners and Special Needs Students in grades 3 through Adult. We continually monitor the needs and trends of the educational community and adjust our product offerings accordingly. Most of the materials shown in this catalog provide content at grade level but are presented in a high interest format and at a reading or vocabulary level that is usually several grades lower. This makes the majority of these products particularly appropriate for use in Special Education, ESL/ELL, Adult Basic Education and any situation that deals with students that are functioning below grade level.

Filled with adapted content that exposes students to subjects at the middle and high school-level, these books are designed to encourage learning with carefully paced lessons and a focus on basic skills. Students benefit from these textbooks when they:

- Read three or more grades below level
- Divide their time between regular classrooms and sheltered environments
- Need dedicated support to make lessons understandable
- May move directly to work or transition programs

These Alternative textbooks help students who are on track toward graduation but need extra support. Based on national and state standards and filled with accessible features, they engage students who struggle with reading, language, or a learning disability. Choose them for students who:

- Read one to three grades below level
- Attend general education classes
- Need some assistance to stay on track for graduation
- May pursue post-secondary academics

The PCI Reading Program is a scientifically research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities to read. Designed as a three-level system, the program helps nonreaders learn to read step-by-step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

**LEVEL ONE**

PCI Reading Program Level One teaches 140 basic sight words from the Dolch and Fry lists and “real-world” words through a comprehensive system of repetition, “hands-on” practice, controlled-vocabulary reading, and high-interest activities. Students progress from reading individual words to 8-12 word sentences. Level One includes 28 books, ranging in length from 8 to 12 pages. The PCI Reading Program is a scientifically research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities to read. Designed as a three-level system, the program helps nonreaders to read step-by-step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

**LEVEL THREE**

PCI Reading Program Level Three serves as a bridge between the whole-word visual discrimination approach in Levels One and Two and the decoding required of independent readers. To promote student success, instruction is carefully scaffolded to introduce students to the process of decoding by unveiling sounds that are embedded within the sight words they already know how to read. Students learn to examine known sight words, recognize common onsets and rimes, match phoneme sounds to letters and decode unfamiliar words such as “bat” and “rake.”

WHITE LIGHTNING BOOKS
This series addresses a wide variety of themes and interests in a narrow range of reading levels, no higher than 2.5. Each book is approximately 100 pages with covers that will appeal to young teen readers. The titles in the White Lightning series are designed in a similar style. Students will know what to expect when they pick up a book: a fast-paced story, mature and age-appropriate topics, short chapters, and achievable reading success.

Themes Include: Friendship, Bullying, Loneliness, Crime, Lying, Technology, Disability, Learning Differences, Self Confidence, Divorce, Social Skills, Physical Limitations, Popularity, Dating, Outcast, Being Late, Respect, Violence, War, Social Media, Revenge, Cruelty, Summer Camp, Trust, Fairness, Determination and more. DIFFERENTIATED CLASSICS

Our ten top selling Timeless Classics and Shakespeare titles are now available in two different reading levels. Group A books are written at a Reading Level: Grades 1.0-2.0 (Lexile Level 140L-250L) and Group B Books are written at Reading Level: Grades 3.1-5.2 (Lexile Level 430L-700L) Words and phrases that may have stumped emergent readers have been eliminated. We recognize that students in the same classroom may not have equivalent reading skills, which is why the two levels appear virtually identical—on the outside. Inside it's a whole different look, with a larger font and extra white space, making these stories visually appealing with the aim to improve reading comprehension, fluency, and confidence.

### BASIC READING SKILLS

Help students master reading skills across the curriculum.

This time-tested and research-based program helps middle and high school students of varying skill levels gain independence in reading. Key to the program’s success is its emphasis on engaging content-area reading in literature, social studies, science, and mathematics. The program consists of eight levels, each with an Annotated Teacher’s Edition. Reading Levels: Grade 3–Grade 10. Each program level offers six theme-based units. The first four lessons enable students to learn a skill by reading selections in literature, social studies, science, or mathematics. The remaining lessons help students develop skills in word analysis, vocabulary development, critical thinking, studying, and daily-living activities such as using the Internet to search for a job, or reading a driver’s license application or a bus schedule.

A comprehensive Assessment Manual, which includes a Placement and Diagnostic Guide as well as Progress Monitors by level, is provided to ensure proper student placement and ongoing assessment. The program offers extensive support for teachers, including activities for before, during, and after reading; ESL/ELL support strategies; and useful professional development references to help in refining reading instruction.

FUNDAMENTAL READING

JOURNEY TO SUCCESS

is a reading and writing program designed for high school and adult learners. The student books and accompanying teacher’s guides represent research-based principles and best teaching practices. Journey to Success develops explicit connections between reading in the content areas, vocabulary, writing, speaking and listening, and language instructions as suggested by the College and Career Readiness Standards for Adult Education.

Each student book is divided into four units: Work and Life Skills; Social Studies; Science; and Literature. Each unit contains three 10-page lessons and a unit review. Students work with authentic reading selections that include practical, informational, and literary texts. Writing assignments reflect real-world and academic activities that draw on elements of the readings.

In Journey to Success, students work independently and collaboratively. Many activities allow students to discuss ideas and share responses, providing opportunities for speaking and listening practice. Extension activities in each lesson encourage students to research topics, analyze information, and apply skills to new situations. Students engage in group discussions, respond to stimuli such as quotations and photographs, and connect the lesson’s content to real-world scenarios. Students draw on their knowledge and life experiences and learn how the readings are relevant beyond the classroom. Answer Keys at the back of student books allow students to monitor their progress and work at an individual pace.

Pre-Algebra Curriculum—a complete, slower paced course with the same scope and sequence as a regular pre-algebra course. Pre-Algebra Curriculum is divided into two semesters to teach a full year's curriculum. Written for middle school and high school students with learning differences, the content's reading level has been kept at Grade 3.0-5.0 without sacrificing solid mathematics content. Mathematics vocabulary essential to problem solving is defined and set in bold type in the student text. The components of the curriculum include three consumable student texts/workbooks and a teacher resource for each semester. Pre-Algebra Curriculum has been carefully written to comply with the national standards and objectives to help prepare students for standardized tests. The program can be used in self-contained and inclusive settings.

STUDENT TEXTS

Student texts include both easy-to-read lessons and pages for reinforcement. Each lesson is typically contained within two pages, and two worksheets follow the lesson. Extra practice sheets are included at the end of each student text. Students have the opportunity to learn, practice, and then review essential skills using multiple worksheets. Problems can be worked directly in the student text, which eliminates the need to transfer information. Word problems that focus on “real-world” skills are provided on most sheets.

TEACHER RESOURCE

The Teacher’s Resource supports the material covered in all three student books. It is reproducible and contains lesson plans, extra worksheets, quizzes, tests, and answer keys. The lesson plans contain teaching suggestions and additional activities to reinforce the skills being taught. About 150 extra worksheets are included for more practice and can double as additional quizzes.

ALGEBRA and PRE ALGEBRA WARM UPS

Develop and practice key pre-algebra and algebra skills. Designed for middle and high school students with learning differences, each book includes 180 open-ended questions written at a Reading Level of 3-5. Questions use the same vocabulary and wording found on state and national tests. Each book's questions deal with the major objectives and skills that make up one of the five NCTM strands. Answer keys are provided in each book.

**Look at Math** helps older students succeed by creatively illustrating abstract concepts. The comprehensive curriculum covers a lot of territory—from adding and subtracting to integers, equations, and fractions. The Comprehensive curriculum covers a lot of territory—from adding and subtracting to integers, equations, and fractions. The Student Book emphasizes both situational and number line illustrations to help students visualize math concepts. Look at Math is divided into three units: Numbers, Measurement, and Fractions. Eleven chapters follow the same 22-page format: Big Ideas, Vocabulary, Picture It and Practice, Story Problem, Quiz and Challenge. Concepts increase in difficulty as the student progresses. The Instructor’s Guide details 120 lessons—each with an objective, introductory script, alternative teaching suggestions, and completed sample Student Book pages. Each lesson, color-coded by unit provides a step-by-step procedure for teachers to follow in their daily instruction. Thumbnails of the student pages are included as a reference point along with the answers for all the math exercises. To start ever chapter, three Big Ideas are presented highlighting the chapter’s key math facts. The chapters continue with four progressive topics ending with an assessment quiz to determine student mastery.

**Look at Math** makes math concepts more explicit by representing them with number places on a number line. Start with reading the lesson title. Then after reading the instructions, decide whether you would like to set up the materials as described in the lesson (with the electronic resources provide on the USB flash drive). Use a whiteboard to make additional examples of the math problems and to enhance overall student engagement.

Word Problems from the Real World

Help students master problem-solving skills through real-world applications with this binder of 160 reproducible activities. Students are exposed to examples of how math is encountered in everyday life. At the same time, students practice solving word problems correctly using addition, subtraction, multiplication, division, decimals, percents, and sales tax. Reading Level: Grades 3-4

Features:

• One- and Two- step problems Many math word problems must be solved using two or more steps. In this program, students ease into two-step word problems. Two-step problems are broken into two separate question on one worksheet. Students must use the answer to the first question to solve the second problem. This method guides Students who struggle with math and makes the two-step problems easy to understand and solve.

• Four Levels In Levels 1 and 2, students solve one-step problems. In Level 3, Students solve two-step problems. In level 4, students must figure out if the problems are one-step or two-step problems, solve them, and write the answers.

**Math in Everyday Life**

A collection of mathematical problems faced in everyday life. Not a "textbook" in the traditional sense of offering instruction as to "how to do" various things. Teachers instead provide whatever teaching may be necessary for students to be able to solve the math problems in this 214-page workbook.

**Makes the subject of consumer math relevant to students.** Math problems are chosen from the everyday life of a fictitious, "average" family. Problems include banking, budgets, shopping, home expenses, insurance, car expenses, and income tax. Included are authentic forms (such as deposit slips) and worksheets (such as budgeting sheets). In many instances, students will visit local stores, read local newspapers, collect information from local sources, and the like—all in order to do the problems in the workbook. The workbook is set up to allow teachers to use as much or as little of their own imagination as they wish. Each activity is largely independent of all others. **Reading Level: Grade 7.0**

The 76-page **Teacher's Guide** contains answers, teaching suggestions and chapter notes:

FOCUS ON SCIENCE
Maximize learning, while minimizing the demand for equipment
This program presents important science concepts in language that is comfortable for on-level readers, as well as readers who read as much as one year below grade level. Controlled vocabulary, carefully selected illustrations, and meaningful science activities work together to provide a positive learning experience for students. The student text has three units—Life Science, Earth Science, and Physical Science. Each unit and chapter opens with an appealing photograph and brief text that encourages reflection and discussion. The opening page of each chapter also introduces the large science concepts students will encounter in their reading and activities. Six lessons follow each chapter opener. Each chapter provides students with a meaningful hands-on activity. These activities have been designed to maximize learning while minimizing the demand for equipment.

Show students how our legal system affects their lives!
Do your students know the difference between criminal and civil courts? What distinctions does the law make between juvenile and adult lawbreakers? What are their rights in court? This book examines these and other fascinating questions as they explore the role of the law in today’s society.
Students will begin their investigation of the U.S. legal system by learning key ideas about the different kinds of laws and their basic rights. Engaging readings show how the law affects such daily activities as going to school, driving a car, shopping at the mall, and working part-time.
Students will explore legal issues in today’s news, from curfews for teens and doctor-assisted suicides to domestic violence and militia groups. Thought-provoking questions and exercises follow each reading to help check the understanding of key ideas and to allow students to examine their own thoughts on these important issues. A pretest and a posttest let students gauge their comprehension of the concepts learned, and a glossary provides a handy reference for legal terms. Reading Level: Grades 5-6

Explore World History is a standards-based curriculum for secondary students that follows a chronology from early humans to modern times. The Student Book has 14 chapters divided into three types: Keys to History, Historical Eras, Historical Themes. Key chapters include Geography, Study Tools, and Biographies. The six Era chapters focus on major historical concepts, like Agriculture or Trade, and are linked to a particular era. Chapters follow a consistent format: Big Idea, Vocabulary, Chapter Overview, Important Topic, Review, and Write About It. The simplified text is heavily illustrated and intended to be read to students so there is no minimum reading level required. Students are presented with important social study tools, like timelines, maps, and tables. Each 210-page resource features 30 one-page stories, or shorts, that focus on key historical concepts. The Instructor's Guide presents a sequence of ninety seven 45-minute lessons by integrating the use of the Student Book, Reference Booklets, and Video Clips. The Guide provides PDFs on disc of all student materials plus chapter and unit assessments at two different levels. The 108 study cards help students review the big ideas in the chapter and prepare for the Quizzes and Term Tests.

**STePPING OUT CURRICULUM**

Stepping Out presents a complete and comprehensive community-based instruction (CBI) curriculum. While the programmatic approach is designed to initiate pre-outing activities and rehearsals in the classroom, its focus is to take instruction out of school and into the community. Materials allow you to both rehearse in the classroom and take students into the community. The range of life skills covered extends from simple and basic such as using a public restroom, to more complex, like banking.

The curriculum sets lesson plans for 19 standard outings, plus additional personalized activities. A unique collection of 23 stepping out cues helps students perform activities without prerequisite academic skills. Use the cues as long-term adaptations or fade them as skills develop. Dozens of structured classroom activities prepare students for community experiences. Assessments and parent involvement forms help advance community-based instruction goals in the IEP. Print out extra cues and supplemental material from the CD.

**SURVIVAL SIGNS**

Survival Signs gives individuals written practice in learning the functional meaning of important signage at home, at work, and in the community. The resource contains a two-page teaching guide for each of the 40 outdoor and 40 indoor survival signs. The guide also includes discussion activities and a reproducible Community Trip Record Chart for the teacher to record the various places in the community where each sign is located. The easy-to-follow student worksheets feature large, detailed illustrations of the signs to help participants with limited reading skills. This program is effective with students of all ages, the worksheet format helps visual learners, and those with limited reading and/or comprehension skills, learn to recognize the picture symbols and the written words on signs. Divided into two tabbed sections, the sturdy three-ring resource contains the worksheets that cover the signs in groups of five. As participants become familiar with the first group, additional signs are added to the worksheet program. After 10 signs have been covered, review worksheets mix the survival signs for more challenging practice. This process is continued until all 80 signs have been taught and reviewed. Reading Level: Grades 0-1
