Special Needs and Struggling Learners

Founded in 1978, Wieser Educational is a family owned business dedicated to providing the best possible instructional materials to meet the needs of Struggling Learners and Special Needs Students in grades 3 through Adult. We continually monitor the needs and trends of the educational community and adjust our product offerings accordingly. Most of the materials shown in this catalog provide content at grade level but are presented in a high interest format and at a reading or vocabulary level that is usually several grades lower. This makes the majority of these products particularly appropriate for use in Special Education, ESL/ELL, Adult Basic Education and any situation that deals with students that are functioning below grade level.

Choose the right textbook for your struggling learners

Since one textbook format cannot fit all students' individual needs, Wieser Educational provides a selection of textbooks that will allow you to choose the one that most closely matches the needs of your students. When using this catalog, look for the **"Foundational"** and **"Alternative"** icons as shown below to help identify the correct textbook choice for your students.

Foundational

When students require more assistance than the Alternative textbooks provide, we offer Foundational textbooks. Filled with adapted content that exposes students to subjects at the middle and high school-level, these books are designed to encourage learning with carefully paced lessons and a focus on basic skills. Students benefit from these textbooks when they:

- Read three or more grades below level
- Divide their time between regular classrooms and sheltered environments
- Need dedicated support to make lessons understandable
- May move directly to work or transition programs

Alternative

These Alternative textbooks help students who are on track toward graduation but need extra support. Based on national and state standards and filled with accessible features, they engage students who struggle with reading, language, or a learning disability. Choose them for students who:

- Read one to three grades below level
- Attend general education classes
- Need some assistance to stay on track for graduation
- May pursue post-secondary academics

The **PCI Reading Program** is a scientifically research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities to read. Designed as a three-level system, the program helps nonreaders learn to read step-by-step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

LEVEL ONE

PCI Reading Program Level One teaches 140 basic sight words from the Dolch and Fry lists and “real-world” words through a comprehensive system of repetition, “hands-on” practice, controlled-vocabulary reading, and high-interest activities. Students progress from reading individual words to 8-12 word sentences. Level One includes 28 books, ranging in length from 8 to 12 pages. By the end of Level One, nonreaders will have progressed to approximately a 1.0 reading level. PCI Reading Program Level One is designed as a one-on-one program and takes at least one full school year to complete.

PX2072HA PCI Reading Level Two Complete Kit\$735.00

The **PCI Reading Program** is a scientifically research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities to read. Designed as a three-level system, the program helps nonreaders to read step-by-step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the Three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

LEVEL THREE

PCI Reading Program Level Three serves as a bridge between the whole-word visual discrimination approach in Levels One and Two and the decoding required of independent readers. To promote student success, instruction is carefully scaffolded to introduce students to the process of decoding by unveiling sounds that are embedded within the sight words they already know how to read. Students learn to examine known sight words, recognize common onsets and rimes, match phoneme sounds to letters and decode unfamiliar words such as “bat” and “rake.”

An ever-growing number of middle and high school students are functionally illiterate. This means that there are many teens who are still emergent or beginning readers. Research shows that students who lack a grounding in decoding skills and phonemic awareness are not simply reluctant readers; they are deeply challenged readers. These older students need phonics decoding skills in order to master reading—but such skills must be taught in the context of their actual ages and interests, not in the context of a kindergarten or first-grade curriculum and pedagogy.

This program has been developed specifically for emerging teen readers who are developing their decoding skills. Written at emergent and beginning reader levels, the books have been carefully controlled to showcase phonics skills, beginning with CVC words and progressing through long vowels. Accompanied by dynamic full-color photos, the engaging storylines are teen centric and represent a wide variety of genres. Each level features eight 16-page books, six fiction and two nonfiction. Each book includes a Word List, organized by phonics skills. Vocabulary-building words are highlighted in the text. A Teacher's Guide supports each book with a lesson plan, vocabulary-building activities, guided reading questions, reproducible activities focusing phonics skills and comprehension, plus a quiz.

Each box set includes:

- 3 each of 24 titles—72 books in total
- 152-page Teacher's Guide with lesson plans, reproducible activities, and book quizzes

Builds all five critical reading components:

- Phonemic Awareness
- Phonics
- Comprehension
- Vocabulary
- Fluency

These High Interest Phonics books are designed to equip older, struggling learners with the phonic foundations they need to become fluent readers. All too often, older readers have gaps in their phonic knowledge and skills which prevents them from making further progress. These series plug the gaps by engaging older readers in age-appropriate, appealing stories while introducing step-by-step phonics within controlled, decodable texts. Once the teacher has taught the target phonics in each book, the student can read the book successfully and independently! This phonic structure ensures that the students develop their reading skills as they progress through the series. Students will grow in confidence, motivation and self-esteem, and will be able to tackle increasingly complex texts. The **Moon Dogs Series** offers older readers a chance to start at the very beginning. Attractively illustrated in a contemporary style, the stories surround a group of kids who play in a band. The **Magic Belt, Totem, Talisman, and Titan's Gauntlets Series** use the quest genre with fantastic illustrations to motivate those who struggle with reading. Secret symbols, morphing and magic will appeal to older readers. **Alba** and **Rescue** are magical series with strong female heroines and will appeal to both girls and boys.

DIFFERENTIATED CLASSICS

Our ten top selling **Timeless Classics** and **Shakespeare** titles are now available in two different reading levels. **Group A books** are written at a **Reading Level: Grades 1.0-2.0 (Lexile Level 140L-250L)** and **Group B Books** are written at **Reading Level: Grades 3.1-5.2 (Lexile Level 430L-700L)** Words and phrases that may have stumped emergent readers have been eliminated. We recognize that students in the same classroom may not have equivalent reading skills, which is why the two levels appear virtually identical—on the outside. Inside it's a whole different look, with a larger font and extra white space, making these stories visually appealing with the aim to improve reading comprehension, fluency, and confidence.

BE A BETTER READER

Help students master reading skills across the curriculum

This time-tested and research-based program helps middle and high school students of varying skill levels gain independence in reading. Key to the program's success is its emphasis on engaging content-area reading in literature, social studies, science, and mathematics. The program consists of eight levels, each with an Annotated Teacher's Edition. **Reading Levels: Grade 3–Grade 10.** Each program level offers six theme-based units. The first four lessons enable students to learn a skill by reading selections in literature, social studies, science, or mathematics. The remaining lessons help students develop skills in word analysis, vocabulary development, critical thinking, studying, and daily-living activities such as using the Internet to search for a job, or reading a driver's license application or a bus schedule.

A comprehensive Assessment Manual, which includes a Placement and Diagnostic Guide as well as Progress Monitors by level, is provided to ensure proper student placement and ongoing assessment. The program offers extensive support for teachers, including activities for before, during, and after reading; ESL/ELL support strategies; and useful professional development references to help in refining reading instruction.

- **Workbooks accompany Books 1-6** providing additional, independent practice to help learners master reading skills.
- **The Instructor's Guide offers time-saving, step-by-step lesson plans** for all seven books along with expanded front matter that explains how adults learn—including those with learning disabilities.

BASIC WRITING SERIES

Teach the writing process through simple, sequential steps
Each six-unit resource teaches students to write using “Think, Organize, Write”. This method helps students organize and visualize their writing, encouraging successful writing habits. **Reading Level: Grades 1-3**

Basic Writing 1 introduces “Think, Organize, Write”. By the time students complete the last unit, they will be able to “think” of a topic and main idea, “organize” their ideas, and put their ideas together to “write” a paragraph.

Basic Writing 2 Units begin with an idea inventory so students can reference words or phrases. The units progress to writing two paragraphs about general topics. In final practice activities, students learn to use descriptive words to make their writing more interesting.

Basic Writing 3 Units begin with an idea inventory before moving to the three-paragraph process. The main focus of this resource is to teach students three types of writing: descriptive, narrative, and how-to.

REPRODUCIBLE BASIC PARAGRAPH PRACTICE

Give students a foolproof strategy for writing paragraphs

When faced with a standardized-test prompt, a journal topic, or an essay question, many students have difficulty deciding what to write, how much to write, and in what order to write. Use the process in this program to help. Following the step-by-step process, students use a graphic organizer to write a five-sentence paragraph, including a topic sentence, three detail sentences, and a concluding sentence. Each sentence goes in its own box so students can be sure to include all the parts. After completing all steps, students rewrite the five sentences in paragraph form.

Each reproducible book targets a specific reason for writing, with “real world” lesson themes and basic grammar and composition reviews. Each book includes a CD, which contains a complete electronic version of the reproducible as an “Unlocked PDF.” Unlocked PDFs allow users to copy/paste text and certain images for posting, emailing, projecting on a whiteboard and more. **Reading Level: Grades 3.5-4.5**

LIFESKILLS VOCABULARY

Visit any classroom and you will encounter students with a variety of goals, and not everyone approaches education with the same goal. For some students, school is a direct path to the real world. But many schools don't teach their students functional literacy or how to deal with the basic issues they will encounter in everyday life: preparing a resume, applying for a job, opening a bank account, getting out of debt, understanding credit, and more. These functional words are learned in context with manageable one-page activities. **Reading Level: Grades 3-6**

Topics include: Safety Signs and Symbols, Finding a Job, Employment Forms and Manuals, Personal Healthcare, Government and Law, Citizenship, Legal Documents, Physical Fitness and Nutrition, Social Situations, Succeeding at School and more.

Each book includes a CD containing the complete unlocked PDF which you can use to copy and paste text and certain images, for posting, emailing, projecting on a whiteboard and more.

Pre-Algebra Curriculum—a complete, slower paced course with the same scope and sequence as a regular pre-algebra course
PRE ALGEBRA CURRICULUM is divided into two semesters to teach a full year's curriculum. Written for middle school and high school students with learning differences, the content's **reading level has been kept at Grade 3.0-5.0** without sacrificing solid mathematics content. Mathematics vocabulary essential to problem solving is defined and set in bold type in the student text. The components of the curriculum include three consumable student texts/workbooks and a teacher resource for each semester. **PRE ALGEBRA CURRICULUM** has been carefully written to comply with the national standards and objectives to help prepare students for standardized tests. The program can be used in self-contained and inclusive settings.

STUDENT TEXTS

Student texts include both easy-to-read lessons and pages for reinforcement. Each lesson is typically contained within two pages, and two worksheets follow the lesson. Extra practice sheets are included at the end of each student text. Students have the opportunity to learn, practice, and then review essential skills using multiple worksheets. Problems can be worked directly in the student text, which eliminates the need to transfer information. Word problems that focus on "real-world" skills are provided on most sheets.

TEACHER RESOURCE

The Teacher's Resource supports the material covered in all three student books. It is reproducible and contains lesson plans, extra worksheets, quizzes, tests, and answer keys. The lesson plans contain teaching suggestions and additional activities to reinforce the skills being taught. About 150 extra worksheets are included for more practice and can double as additional quizzes.

PRACTICAL PRACTICE MATH BINDER

Over 600 Real-Life Math Problems to Teach Basic Skills

This 180-page binder covers a wide range of math skills. Students gain an appreciation for the practical application of math as they solve real-life story problems. They must decide whether to add, subtract, multiply, or divide to solve the problems. Other math skills included in the exercises involve money, elapsed time, measurement, percents, decimals, and fractions. Students work through math word problems that involve everyday activities such as comparison shopping, using coupons, buying in quantity, learning about budgets, withholding tax and much more. Some of the word problems are simple, one-step problems while others involve multiple steps that require students to really think about the problem.

Problems are organized by categories such as Career Math, Math at Home, Best Buys, and more. The included whiteboard-ready Resource CD has the entire contents of the binder in PDF format, a complete list of skills and Common Core State Standards, plus over 20 bonus activities, reference pages, blank checks, deposit slips, and more. **Reading Level: Grades 3.0-4.0**

MATH in EVERYDAY LIFE

A collection of mathematical problems faced in everyday life

Not a "textbook" in the traditional sense of offering instruction as to "how to do" various things. Teachers instead provide whatever teaching may be necessary for students to be able to solve the math problems in this 214-page workbook.

Makes the subject of consumer math relevant to students.

Math problems are chosen from the everyday life of a fictitious, "average" family. Problems include banking, budgets, shopping, home expenses, insurance, car expenses, and income tax. Included are authentic forms (such as deposit slips) and worksheets (such as budgeting sheets). In many instances, students will visit local stores, read local newspapers, collect information from local sources, and the like—all in order to do the problems in the workbook. The workbook is set up to allow teachers to use as much or as little of their own imagination as they wish. Each activity is largely independent of all others. **Reading Level: Grade 7.0**

The 76-page **Teacher's Guide** contains answers, teaching suggestions and chapter notes

YOU AND THE LAW

Show students how our legal system affects their lives!

Do your students know the difference between criminal and civil courts? What distinctions does the law make between juvenile and adult lawbreakers? What are their rights in court? This book examines these and other fascinating questions as they explore the role of the law in today's society.

Students will begin their investigation of the U.S. legal system by learning key ideas about the different kinds of laws and their basic rights. Engaging readings show how the law affects such daily activities as going to school, driving a car, shopping at the mall, and working part-time.

Students will explore legal issues in today's news, from curfews for teens and doctor-assisted suicides to domestic violence and militia groups. Thought-provoking questions and exercises follow each reading to help check the understanding of key ideas and to allow students to examine their own thoughts on these important issues. A pretest and a posttest let students gauge their comprehension of the concepts learned, and a glossary provides a handy reference for legal terms. **Reading Level: Grades 5-6**

STEPPING OUT CURRICULUM

Stepping Out presents a complete and comprehensive community-based instruction (CBI) curriculum. While the programmatic approach is designed to initiate pre-outing activities and rehearsals in the classroom, its focus is to take instruction out of school and into the community. Materials allow you to both rehearse in the classroom and take students into the community. The range of life skills covered extends from simple and basic such as using a public restroom, to more complex, like banking.

The curriculum sets lesson plans for 19 standard outings, plus additional personalized activities. A unique collection of 23 stepping out cues helps students perform activities without prerequisite academic skills. Use the cues as long-term adaptations or fade them as skills develop. Dozens of structured classroom activities prepare students for community experiences. Assessments and parent involvement forms help advance community-based instruction goals in the IEP. Print out extra cues and supplemental material from the CD.

WORD PROBLEMS FOR NONREADERS

Word Problems For Nonreaders helps students with limited or no reading skills to solve basic addition, subtraction, multiplication, and division problems! The activity sheets are illustrated to allow visual learners to understand how math works in everyday life. The program consists of three resources (available in Print or CD versions), each focuses on specific math skills: addition, subtraction, or multiplication and division. As a support for nonreaders and struggling readers, the activity sheets are presented in two formats. The first level includes SymbolStix symbols by News-2-You for nonreaders. SymbolStix allows nonreaders to read and understand the clear and simple word problems. The second level, for students who can read, features easy-to-understand sentences without symbols. Both levels include visual representations of the math problems. Each Resource includes 150 reproducible activity sheets; a printable full-color PDF of the entire Resource; clear and simple teacher instructions; a progress chart; and an answer key.

SURVIVAL SIGNS

Survival Signs gives individuals written practice in learning the functional meaning of important signage at home, at work, and in the community. The resource contains a two-page teaching guide for each of the 40 outdoor and 40 indoor survival signs. The guide also includes discussion activities and a reproducible Community Trip Record Chart for the teacher to record the various places in the community where each sign is located. The easy-to-follow student worksheets feature large, detailed illustrations of the signs to help participants with limited reading skills. This program is effective with students of all ages, the worksheet format helps visual learners, and those with limited reading and/or comprehension skills, learn to recognize the picture symbols and the written words on signs. Divided into two tabbed sections, the sturdy three-ring Resource contains the worksheets that cover the signs in groups of five. As participants become familiar with the first group, additional signs are added to the worksheet program. After 10 signs have been covered, review worksheets mix the survival signs for more challenging practice. This process is continued until all 80 signs have been taught and reviewed. **Reading Level: Grades 0-1**
