Choose the right textbook for your struggling learners

Since one textbook format cannot fit all students' individual needs, Wieser Educational provides a selection of textbooks that will allow you to choose the one that most closely matches the needs of your students. When using this catalog, look for the **"Foundational"** and **"Alternative"** icons as shown below to help identify the correct textbook choice for your students.

When students require more assistance than the Alternative textbooks provide, we offer Foundational textbooks. Filled with adapted content that exposes students to subjects at the middle and high school-level, these books are designed to encourage learning with carefully paced lessons and a focus on basic skills. Students benefit from these textbooks when they:

- Read three or more grades below level
- Divide their time between regular classrooms and sheltered environments
- Need dedicated support to make lessons understandable
- May move directly to work or transition programs

Alternative

These Alternative textbooks help students who are on track toward graduation but need extra support. Based on national and state standards and filled with accessible features, they engage students who struggle with reading, language, or a learning disability. Choose them for students who:

- Read one to three grades below level
- Attend general education classes
- Need some assistance to stay on track for graduation
- May pursue post-secondary academics

PHONIC BOOKS FOR STRUGGLING LEARNERS

These High Interest Phonic Books are designed to equip older, struggling learners with the phonic foundations they need to become fluent readers. All too often, older readers have gaps in their phonic knowledge and skills which prevents them from making further progress. These series plug the gaps by engaging older readers in age-appropriate, appealing stories while introducing step-by-step phonics within controlled, decodable texts. Once the teacher has taught the target phonics in each book, the student can read the book successfully and independently! This phonic structure ensures that the students develop their reading skills as they progress through the series. Students will grow in confidence, motivation and self-esteem, and will be able to tackle increasingly complex texts.

Features Include:

- Age appropriate illustrations and story lines that engage and encourage students to read on
- Reading practice page which prepares the student for reading the text.
- Vocabulary page to develop receptive and expressive language
- Multi-syllabic words split on each page
- Reader-friendly layout

The **PCI Reading Program** is a scientifically research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities to read. Designed as a three-level system, the program helps nonreaders learn to read step-by-step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

LEVEL ONE

PCI Reading Program Level One teaches 140 basic sight words from the Dolch and Fry lists and “real-world” words through a comprehensive system of repetition, “hands-on” practice, controlled-vocabulary reading, and high-interest activities. Students progress from reading individual words to 8-12 word sentences. Level One includes 28 books, ranging in length from 8 to 12 pages. By the end of Level One, nonreaders will have progressed to approximately a 1.0 reading level. PCI Reading Program Level One is designed as a one-on-one program and takes at least one full school year to complete.

The **PCI Reading Program** is a scientifically research-based curriculum created specifically to teach students with developmental disabilities, autism, and significant learning disabilities to read. Designed as a three-level system, the program helps nonreaders to read step-by-step, first through whole-word visual discrimination and then through basic decoding using onsets and rimes. As students progress through the Three levels, they learn to read 405 words and become more independent in their ability to decode unknown words.

LEVEL THREE

PCI Reading Program Level Three serves as a bridge between the whole-word visual discrimination approach in Levels One and Two and the decoding required of independent readers. To promote student success, instruction is carefully scaffolded to introduce students to the process of decoding by unveiling sounds that are embedded within the sight words they already know how to read. Students learn to examine known sight words, recognize common onsets and rimes, match phoneme sounds to letters and decode unfamiliar words such as "bat" and "rake."

AMBER GUARDIANS

Each of the 26 page stories in this quest series is carefully written to motivate older readers and build reading stamina. With a higher ratio of text to illustration, these stories allow the reader to make the important step towards understanding meaning purely from text. Action packed from start to finish, this exciting new series features Finn, a well known character from the Magic Belt Phonic Series. A chance discovery of an ancient necklace at an old bazaar soon leads Finn and his friends on an incredible quest. Why is there only one Amber jewel remaining in the necklace? What does the nervous old man hiding in the room of the antique shop know about it? Why are the three friends being followed by a hooded figure in the shadows? The answer to these questions turns out to be something none of them could ever have possibly imagined...

This series is accompanied by a reproducible workbook to help students develop reading, spelling, and comprehension through the study of English morphemes. This workbook is written in British English, so a few words are spelled slightly different from American English. **Reading Level: Grades 3-4**

WHITE LIGHTNING BOOKS

This series addresses a wide variety of themes and interests in a narrow range of **reading levels, no higher than 2.5**. JOURNEY TO SUCCESS

JOURNEY TO SUCCESS is a reading and writing program designed for high school and adult learners. The student books and accompanying teacher's guides represent research-based principles and best teaching practices. **Journey to Success** develops explicit connections between reading in the content areas, vocabulary, writing, speaking and listening, and language instructions as suggested by the College and Career Readiness Standards for Adult Education.

Each student book is divided into four units: *Work and Life Skills*; *Social Studies*; *Science*; and *Literature*. Each unit contains three 10-page lessons and a unit review. Students work with authentic reading selections that include practical, informational, and literary texts. Writing assignments reflect real-world and academic activities that draw on elements of the readings.

In **Journey to Success**, students work independently and collaboratively. Many activities allow students to discuss ideas and share responses, providing opportunities for speaking and listening practice. Extension activities in each lesson encourage students to research topics, analyze information, and apply skills to new situations. Students engage in group discussions, responds to stimuli such as quotations and photographs, and connect the lesson's content to real-world scenarios. Students draw on their knowledge and life experiences and learn how the readings are relevant beyond the classroom. Answer Keys at the back of student books allow students to monitor their progress and work at an individual pace.

BASIC WRITING SERIES

Teach the writing process through simple, sequential steps

Each six-unit resource teaches students to write using “Think, Organize, Write”. This method helps students organize and visualize their writing, encouraging successful writing habits. **Reading Level: Grades 1-3**

Basic Writing 1 introduces “Think, Organize, Write”. By the time students complete the last unit, they will be able to “think” of a topic and main idea, “organize” their ideas, and put their ideas together to “write” a paragraph.

Basic Writing 2 Units begin with an idea inventory so students can reference words or phrases. The units progress to writing two paragraphs about general topics. In final practice activities, students learn to use descriptive words to make their writing more interesting.

Basic Writing 3 Units begin with an idea inventory before moving to the three-paragraph process. The main focus of this resource is to teach students three types of writing: descriptive, narrative, and how-to.

BASIC PARAGRAPH PRACTICE

Give students a foolproof strategy for writing paragraphs

When faced with a standardized-test prompt, a journal topic, or an essay question, many students have difficulty deciding what to write, how much to write, and in what order to write. Use the process in this program to help. Following the step-by-step process, students use a graphic organizer to write a five-sentence paragraph, including a topic sentence, three detail sentences, and a concluding sentence. Each sentence goes in its own box so students can be sure to include all the parts. After completing all steps, students rewrite the five sentences in paragraph form.

Reading Level: Grades 2-4

Each reproducible resource presents 100 “Real World” questions about high-interest topics.

Pre-Algebra Curriculum—a complete, slower paced course with the same scope and sequence as a regular pre-algebra course. **Pre-Algebra Curriculum** is divided into two semesters to teach a full year's curriculum. Written for middle school and high school students with learning differences, the content's **reading level has been kept at Grade 3.0-5.0** without sacrificing solid mathematics content. Mathematics vocabulary essential to problem solving is defined and set in bold type in the student text. The components of the curriculum include three consumable student texts/workbooks and a teacher resource for each semester. **Pre-Algebra Curriculum** has been carefully written to comply with the national standards and objectives to help prepare students for standardized tests. The program can be used in self-contained and inclusive settings.

STUDENT TEXTS

Student texts include both easy-to-read lessons and pages for reinforcement. Each lesson is typically contained within two pages, and two worksheets follow the lesson. Extra practice sheets are included at the end of each student text. Students have the opportunity to learn, practice, and then review essential skills using multiple worksheets. Problems can be worked directly in the student text, which eliminates the need to transfer information. Word problems that focus on "real-world" skills are provided on most sheets.

TEACHER RESOURCE

The Teacher's Resource supports the material covered in all three student books. It is reproducible and contains lesson plans, extra worksheets, quizzes, tests, and answer keys. The lesson plans contain teaching suggestions and additional activities to reinforce the skills being taught. About 150 extra worksheets are included for more practice and can double as additional quizzes.

Look at Math helps older students succeed by creatively illustrating abstract concepts. The comprehensive curriculum covers a lot of territory—from adding and subtracting—to integers, equations, and fractions. The **Student Book** emphasizes both situational and number line illustrations to help students visualize math concepts. **Look at Math** is divided into three units: Numbers, Measurement, and Fractions. Eleven chapters follow the same 22-page format: Big Ideas, Vocabulary, Picture It and Practice, Story Problem, Quiz and Challenge. Concepts increase in difficulty as the student progresses. The **Instructor's Guide** details 120 lessons—each with an objective, introductory script, alternative teaching suggestions, and completed sample Student Book pages. Each lesson, color-coded by unit provides a step-by-step procedure for teachers to follow in their daily instruction. Thumbnails of the student pages are included as a reference point along with the answers for all the math exercises. To start every chapter, three Big Ideas are presented highlighting the chapter's key math facts. The chapters continue with four progressive topics ending with an assessment quiz to determine student mastery.

Look at Math makes math concepts more explicit by representing them with number places on a number line. Start with reading the lesson title. Then after reading the instructions, decide whether you would like to set up the materials as described in the lesson (with the electronic resources provide on the USB flash drive). Use a whiteboard to make additional examples of the math problems and to enhance overall student engagement.

HANDS-ON MATH

Teaches math concepts using number lines.

Hands-On Math (HOM), for students of any age with intellectual disability or autism, is based on two big ideas: Students with disabilities learn when their hands are purposefully engaged, and manipulatives help them grasp abstract math concepts.

HOM is a skill-based program focusing on fundamental math concepts. Its 60 lessons range from counting to solving two-digit addition problems. The heart of HOM is a set of four number lines with slots to accommodate pegs. The number lines are used in combination to demonstrate concepts and help students solve math problems.

Lessons contain three instructional options:

Abstract learners solve problems independently and use number lines to verify their answers.

Representational learners are provided picture cues and other hints to help them complete lessons.

Concrete learners are exposed to concepts but complete lessons without understanding the underlying math.

You can cycle through the options when teaching a lesson to present an easy-to-hard sequence. Or stick with the instructional option that best suits the student's ability as you progress from lesson to lesson.

Five-Step Lesson Process:

- Explain student procedure
- Model procedure for the student
- Guide student through lesson, prompt as needed
- Observe student completing task independently
- Adjust lesson to present additional problems

COMPONENTS

Hands-On Math includes: number lines, Number Book, pegs, activity and symbol cards, dice, number disks, Instructor's Guide and PDF CD-ROM.

HANDS-ON MATH 2

Innovative picture-based lessons with manipulatives.

Hands-On Math 2 (HOM 2) helps students of any age who struggle with math. It begins where Hands-On Math (shown left) leaves off, and progresses to tackle tough concepts like integers and fractions. The Look at Math **Instructor's Guide** presents 120 lessons divided into three units: Numbers, Measurement, Fractions. Each lesson incorporates the Look at Math **Student Book** plus a comprehensive set of manipulatives. Look at Math is heavily illustrated to help students grasp the concepts. The manipulatives, consisting of 12 interchangeable number lines and sets of color coded number pieces, make solving abstract problems easy. Together they encourage all students to participate and succeed at math.

Each of the 12 chapters in Look at Math follows the same 22-page format: Big Ideas, Vocabulary, Picture It practice pages, Story Problems, Quizzes, and a Challenge exercise. The Instructor's Guide integrates Look at Math pages with the hands-on number lines. The Guide also provides a disc with PDFs of the Look at Math book plus additional assessments.

LOOK AT MATH STUDENT BOOK CHAPTERS

MEANINGFUL MATH

Word Problems from the Real World

Help students master problem-solving skills through real-world applications with this binder of 160 reproducible activities. Students are exposed to examples of how math is encountered in everyday life. At the same time, students practice solving word problems correctly using addition, subtraction, multiplication, division, decimals, percents, and sales tax. **Reading Level: Grades 3-4**

Features:

- **One- and Two- step problems** Many math word problems must be solved using two or more steps. In this program, students ease into two-step word problems. Two-step problems are broken into two separate question on one worksheet. Students must use the answer to the first question to solve the second problem. This method guides Students who struggle with math and makes the two-step problems easy to understand and solve.
- **Four Levels** In Levels 1 and 2, students solve one-step problems. In Level 3, Students solve two--step problems. In level 4, students must figure out if the problems are one-step or two-step problems, solve them, and write the answers.

MATH IN EVERYDAY LIFE

A collection of mathematical problems faced in everyday life

Not a "textbook" in the traditional sense of offering instruction as to "how to do" various things. Teachers instead provide whatever teaching may be necessary for students to be able to solve the math problems in this 214-page workbook.

Makes the subject of consumer math relevant to students.

Math problems are chosen from the everyday life of a fictitious, "average" family. Problems include banking, budgets, shopping, home expenses, insurance, car expenses, and income tax. Included are authentic forms (such as deposit slips) and worksheets (such as budgeting sheets). In many instances, students will visit local stores, read local newspapers, collect information from local sources, and the like—all in order to do the problems in the workbook. The workbook is set up to allow teachers to use as much or as little of their own imagination as they wish. Each activity is largely independent of all others. **Reading Level: Grade 7.0**

The 76-page **Teacher's Guide** contains answers, teaching suggestions and chapter notes

180 DAYS OF SCIENCE

This series provides teachers and parents with 180 days of daily practice to build students' science content-area knowledge. The quick, diagnostic-based activities allow busy teachers to cover science content daily. Through weekly units, students will analyze and evaluate scientific data and scenarios, answer constructed response questions, improve their understanding of science and engineering practices, and increase their critical thinking and reasoning skills. Each week will assess students' knowledge of grade-level science content, and focuses on a grade-level topic within one of three science strands: Physical Science, Life Science, and Earth and Space Science. By integrating scientific practices, language arts and math concepts, disciplinary core ideas, and crosscutting concepts, this resource helps teachers meet Next Generation Science Standards (NGSS) and state standards in their classrooms. **The Interest Level ranges from Grade Level to 2-3 years above Grade Level.**

YOU AND THE LAW

Show students how our legal system affects their lives!

Do your students know the difference between criminal and civil courts? What distinctions does the law make between juvenile and adult lawbreakers? What are their rights in court? This book examines these and other fascinating questions as they explore the role of the law in today's society.

Students will begin their investigation of the U.S. legal system by learning key ideas about the different kinds of laws and their basic rights. Engaging readings show how the law affects such daily activities as going to school, driving a car, shopping at the mall, and working part-time.

Students will explore legal issues in today's news, from curfews for teens and doctor-assisted suicides to domestic violence and militia groups. Thought-provoking questions and exercises follow each reading to help check the understanding of key ideas and to allow students to examine their own thoughts on these important issues. A pretest and a posttest let students gauge their comprehension of the concepts learned, and a glossary provides a handy reference for legal terms. **Reading Level: Grades 5-6**

LEARNING TO WORK

Learning to Work is a literacy curriculum for secondary students who do not read conventionally. The 18 photo-illustrated stories are intended to be read with a partner—a same-age peer who is reading at grade level—a teacher or a parent. **Reading Level: Grade 1.5**

The work-themed stories feature a simple, consistent structure using repetitive phrases and sentences to help students focus on the text. Photos correspond closely to the stories' content. The primary characters are people with disabilities shown in actual work settings: a medical facility, a garden center, and a fast food restaurant. An activity page encourages readers to talk about their own experiences using a review-and-discuss format.
